

## **CERTIFICATE OF INSTALLATION**

Certificate of Installation forms are issued to Producer Members along with seals. A Producer Member Seal Type 1 or Type 2 shall be affixed to each shelter produced. The serial number of the Seal shall be recorded on a Certificate of Installation form. When the Producer Member affixes Type 1 seal and installs the shelter, the Producer Member embosses the Certificate and gives it to the owner of the shelter. A copy of the completed certificate shall be retained by the Producer Member and a copy shall be sent to NSSA headquarters.

When the shelter is to be installed by an Installer Member of NSSA, the Producer Member affixes Type 2 seal and enters the Serial Number of the seal on a Certificate of Installation. When installation is completed, the Installer Member affixes a Type 3 seal to the shelter, embosses the Certificates, gives the (original) embossed certificate to the owner, retains a copy, and sends copies to the Producer Member and to NSSA headquarters.
